

ABSTRACT OF THE DISCLOSURE

5 A fluid meter, in particular a water meter,
comprises a tank having a bottom and into which is
inserted through an opening opposite the bottom in an
insertion direction parallel to its axis of symmetry a
measurement chamber having at least one orifice connected
in a sealed manner to a pipe of the tank via a seal that
is adapted to be compressed between an external surface
of the chamber and an internal surface of the tank. The
10 seal consists of a bead of polymerizable plastic material
deposited onto one of the surfaces.
